TOTAL SUPPORT TRAINING

Asbestos Awareness

Total Support Training offer this course which ends in a non-accredited certificate as proof of completion, to anyone who might be exposed to asbestos during alterations or refurbishment to a building. This non-affiliated training is designed to raise awareness and to explain the risks associated with asbestos and how to avoid them. Asbestos exposure was not fully understood for many years and deaths are still being reported from exposure from years ago, sometimes in childhood and in people who were not even directly exposed as far as they could tell. It is therefore vital that anyone who might come into contact with asbestos is trained to be alert to the dangers and be provided with a basic knowledge base that will enable them to save themselves and others from inadvertent exposure.

Course Content

- What is asbestos
- Health effects from asbestos
- Where it is most often found in a building
- When asbestos is a danger
- Avoidance of exposure
- Current legislation governing removal and risk assessment
- Reporting procedures when asbestos is discovered

Training Method

This course is of half a day duration and is delivered by means of a PowerPoint presentation with related handouts.

Duration: ½ Day

Certification: A Total Support Training certificate will be awarded on successful completion of this course.

Cost: £55 plus VAT (Per Person)
